

EDA Report - Diabetes HbA1c Data

1. Executive Summary

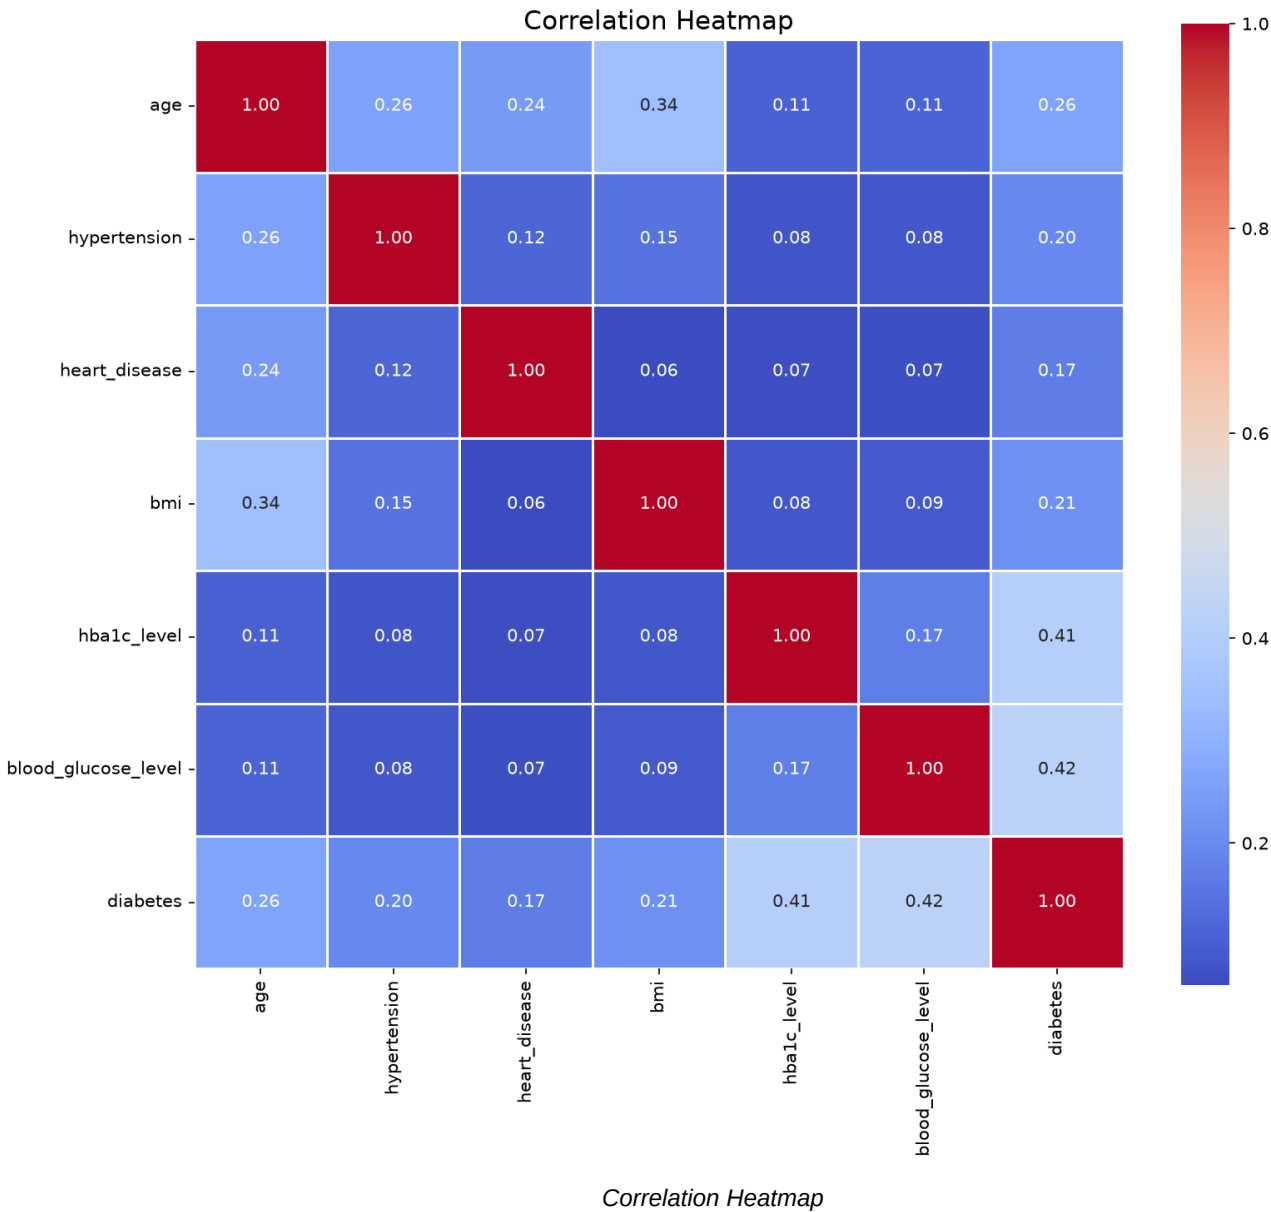

This report presents an Exploratory Data Analysis (EDA) on the Diabetes HbA1c dataset. It covers data cleaning, descriptive statistics, visual analysis, and correlation discoveries.

2. Analysis Pipeline Overview

The raw dataset was cleaned using median/mode imputation and deduplication. Outliers were detected but retained for accurate clinical distribution mapping.

3. Data Visualizations

Below are generated visualizations derived from the processed data:
